

# FICT Greenhouse Gas Emission Reduction Targets

Environmental Policy: To realize a sustainable society, FICT set carbon emission and reduction targets and announce a progress as a measure against climate change.

Scope*	FY** 2030 Goal	GHG*** Emission (CO <sub>2</sub> ton)		
		FY2023 Result	FY2024 Result	FY2030 Target
Scope 1+2	29% reduction by FY2030	49,486	43,000	28,997
Scope3	To make suppliers who provide purchased products, services, etc. set SBT*** targets	121,971	75,655	TBD
<b>Total</b>		<b>171,457</b>	<b>118,655</b>	TBD

\*Scope = A broad category of emission sources defined in the international framework for companies to calculate and reduce their greenhouse gas emissions (GHG Protocol).  
 Scope 1 = CO<sub>2</sub> emissions by the company (e.g., gas use) Scope 2: Indirect CO<sub>2</sub> emissions (CO<sub>2</sub> emissions by electric power companies for electricity use) Scope 3: Supply chain emissions (e.g., emissions by component suppliers)

\*\*Fiscal Year

\*\*\*Greenhouse gas

\*\*\*\*SBT (Science Based Target)

Setting a goal to limit the rise in global temperatures to within 1.5°C, which is the goal of the Paris Agreement
